## METAL LASER FABRICATION

Metal fabrication is the creation of metal structures by cutting, bending and assembling processes. It is a value-added<sup>[1]</sup> process involving the creation of machines, parts, and structures from various raw materials.

Typically, a fabrication shop bids on a job, usually based on engineering drawings, and if awarded the contract, builds the product. Large fab shops employ a multitude of value-added processes, including welding, cutting, forming and machining.

## HAMRA TOWER

## WOOD PROMOTION BOOTH

A promotion booth serves as the cornerstone for businesses aiming to make a significant impact at trade shows and exhibitions.

# LED

## DISPLAY STANDS

LED display screens are a display technology that uses an array of light-emitting diodes (LEDs) as pixels to create images and videos. Unlike traditional LCD displays, LED screens are self-illuminating, producing brighter, more vibrant visuals, higher contrast, and superior energy efficiency. Key components include LED modules, a control system, a power supply, and a protective cabinet. LED displays offer high brightness, long lifespans, and durability, making them suitable for applications like digital signage, billboards, scoreboards, and as alternatives to projectors.

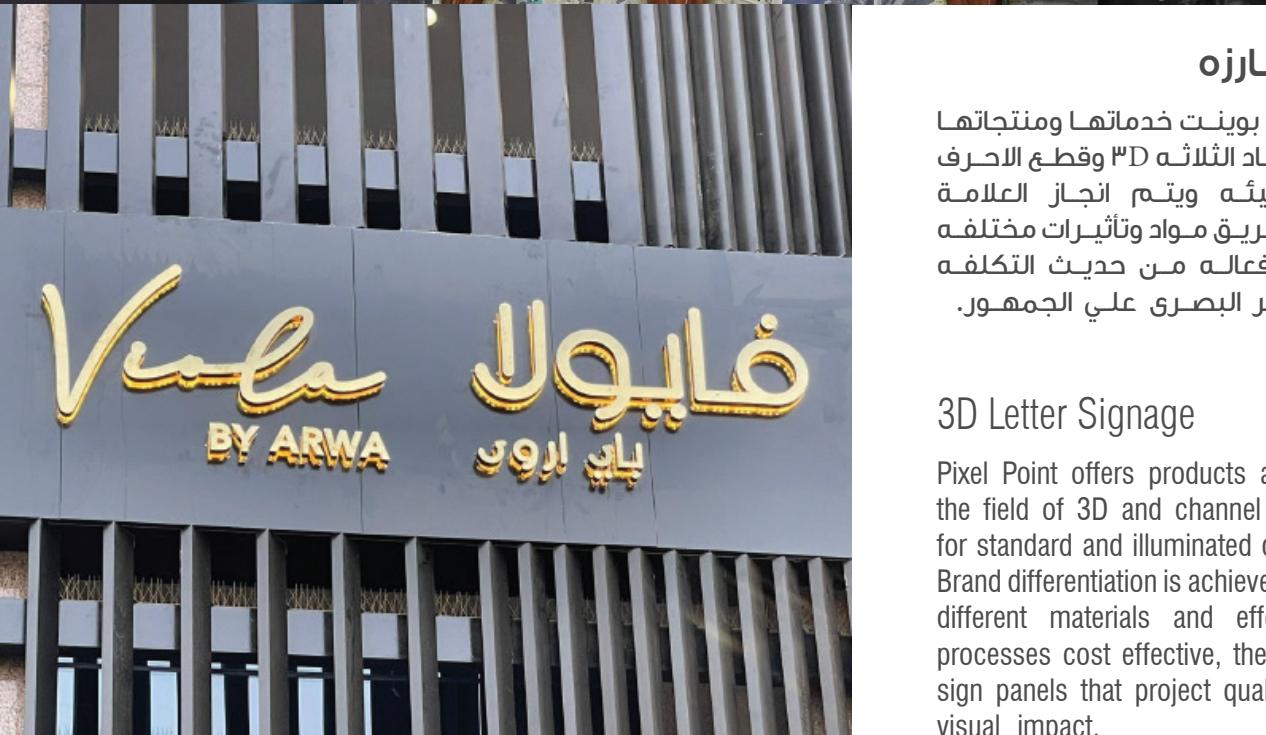

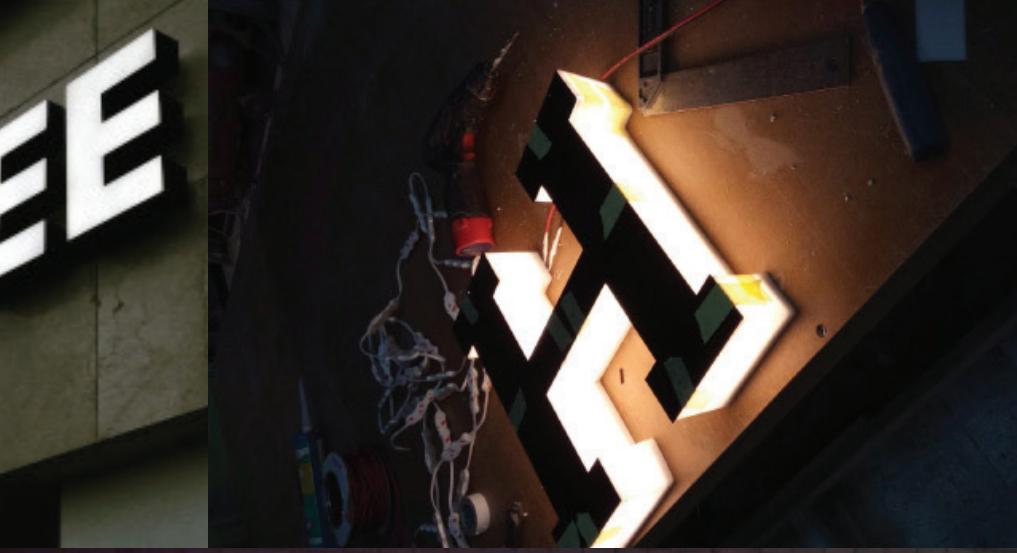

## ALUMINUM 3D SIGNBOARDS

Aluminium channel letters signboards, also known as aluminum channel letter signs, are a popular type of signage widely used in the advertising and branding industry. These signs are made by shaping individual letters or logos using aluminum channels, which are then illuminated for enhanced visibility.

## الحروف البارزة

تقديم بكسيل بوينت خدماتها ومنتجاتها في مجال الابعاد الثلاثه 3D وقطع الاحرف لللوحات المضيئة ويتم انجاز العلامة التجارية عن طريق مواد وتأثيرات مختلفة وهي طريقة فعالة من حيث التكلفة المالية والتأثير البصري على الجمهور.

## 3D Letter Signage

Pixel Point offers products and services in the field of 3D and channel letters signage for standard and illuminated communication. Brand differentiation is achieved by combining different materials and effects including; processes cost effective, they also result in sign panels that project quality with a high visual impact.

## FLEX & BANNER LARGE FORMAT PRINTING

Flex printing, also known as flexographic printing, is a modern printing technique widely used in the advertising and packaging industries. Its versatility, cost-effectiveness, and ability to produce high-quality prints make it a popular choice for businesses looking to create impactful visual communications.

## VEHICLE GRAPHICS

A car decal is a decorative outdoor sticker that (as the name suggests) is put on the car to either decorate it, express a catchy message or advertise a business.

# VEHICLE BRANDING STICKERS

## FABRIC PRINTS BACK LIGHT PRINTINGS

Fabric for backlit prints is a specialized, light-diffusing textile designed to be illuminated from behind by LED lights, creating vivid, glowing images in lightboxes, signs, and displays. The fabric is printed using sublimation or other digital printing methods, often finished with a silicone edge (keder) for easy installation in tensioned frames, providing a modern, seamless aesthetic with excellent color depth and light distribution.

## BEACH FLAGS PRINTING

## ROLLUPS X STANDS POPUPS MINI ROLLUPS

### PROMOTION DISPLAY STANDS

Promotional stands for promoting and advertising your business at trade show exhibitions and promotional events. Choose from a wide selection of styles and sizes.

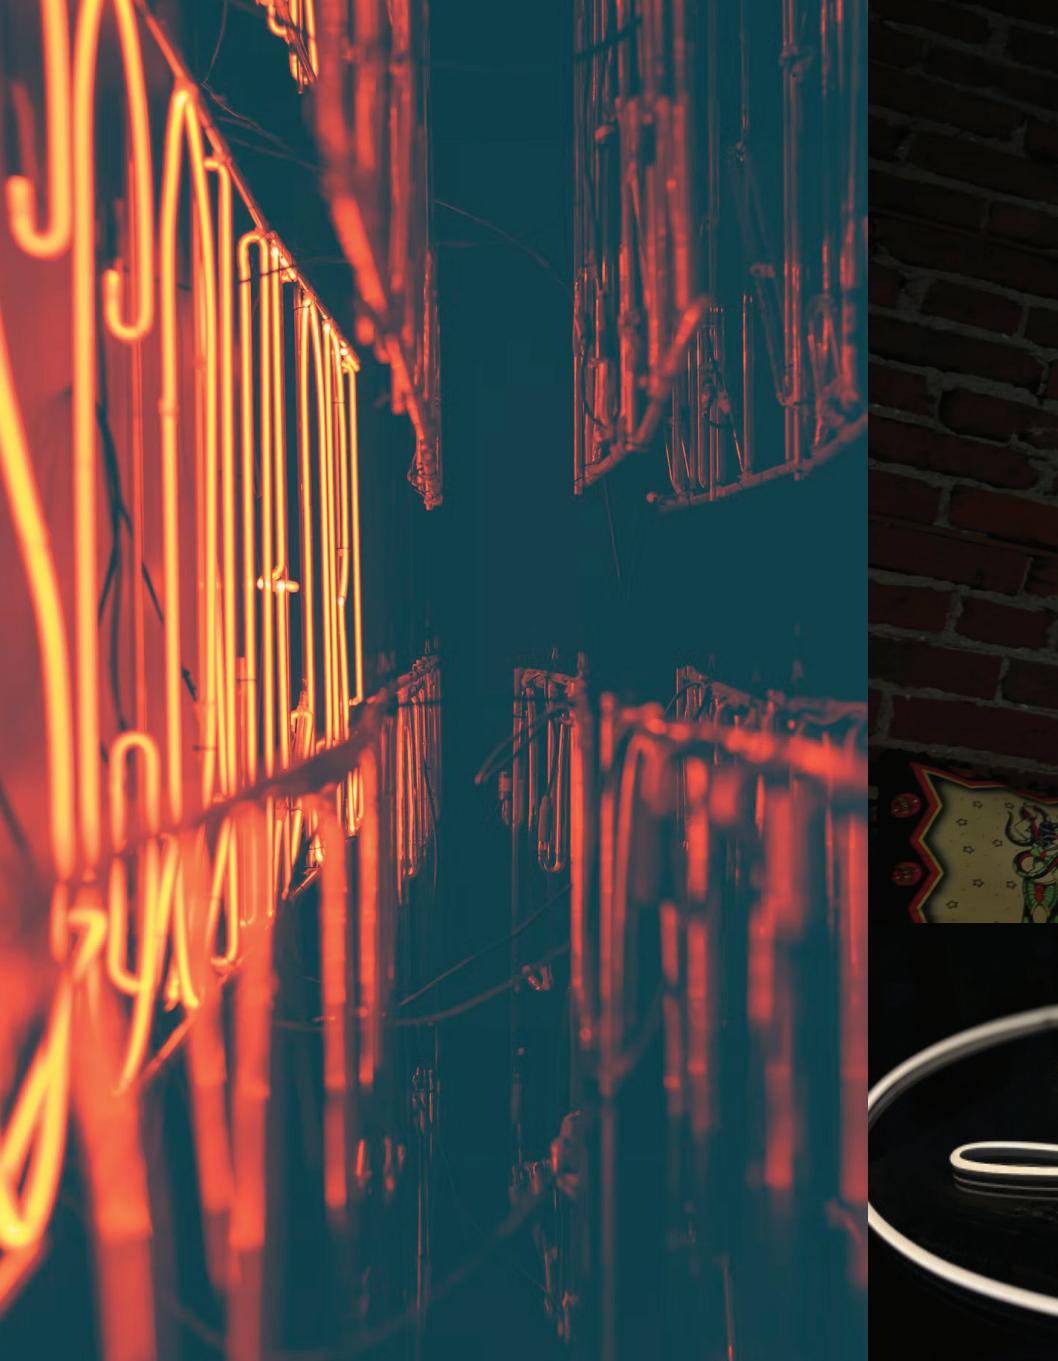

## MUG AND T-SHIRT PRINT

T-shirt printing, otherwise known as screen printing, is a simple and inexpensive method of printing your own custom designs or logos onto a t-shirt. Basically, a printer paints an image or design on a special paper and cover-coats it on the mug. Post-coating, the print is transferred into a water slide transfer.

## LED NEON SIGNS

LED Neon Flex is a special designed strip light encapsulated inside of a milky plastic or silicone molding. The molding diffuses the strip light which projects the light with not visible dots or hot spots.

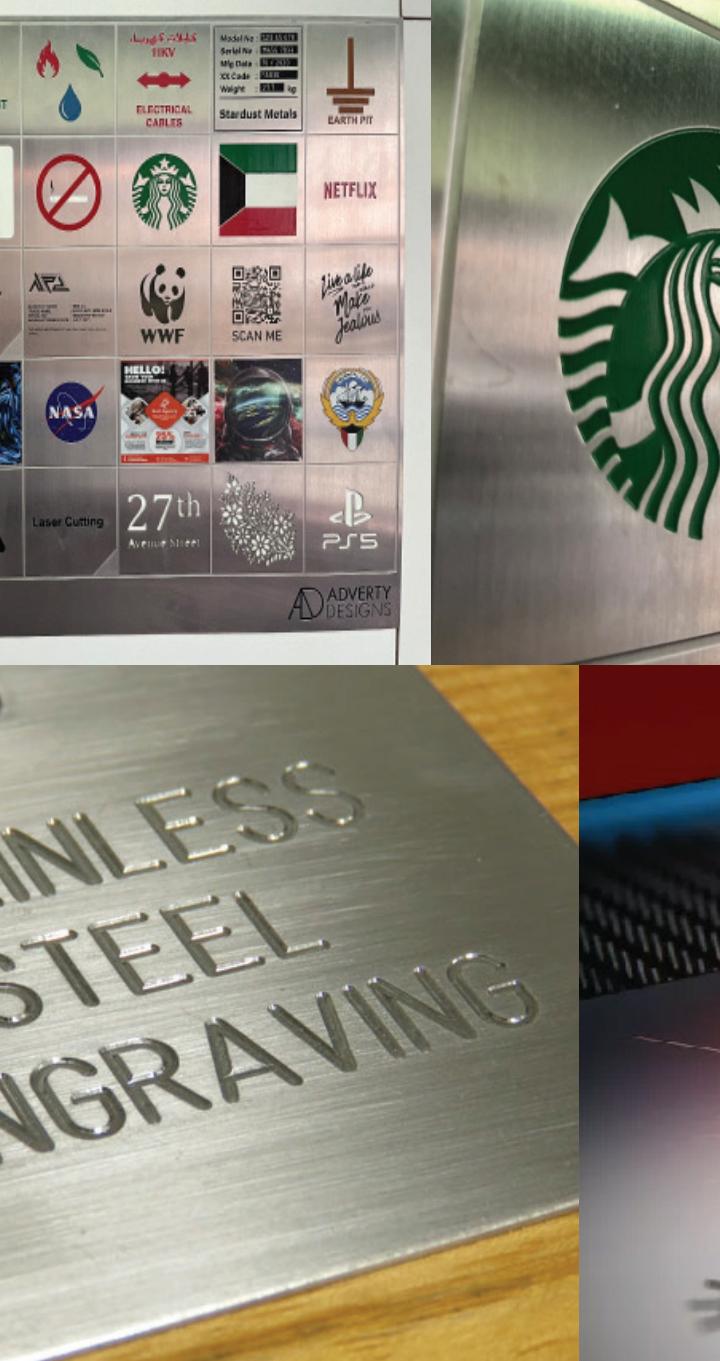

## METAL FABRICATION

Welding is the main focus of steel fabrication. Formed and machined parts are assembled and tack-welded in place, then rechecked for accuracy. If multiple weldments have been ordered, a fixture may be used to locate parts for welding. A welder then finishes the work according to engineering drawings (for detailed welding) or by their own experience and judgement (if no details are provided).

## ENGRAVING AND PRINTING

Engraving is the technique of cutting designs into a hard surface, like metal, glass, or wood, with a tool called a burin or a modern laser, to create a decorated object or a printing plate. This ancient craft can result in a finished product such as a personalized ring or trophy, or it can produce an intaglio print on paper, where lines are incised into a plate to hold ink.

## TRAFFIC SIGNS AND STICKERS

Here are the meanings associated with each colour: Red safety signs signify prohibition or a fire safety hazard. Yellow signs represent warnings or cautions. Blue signs denote mandatory actions or instructions. Green signs indicate safe conditions or first aid information.
